

Respect

Equality

Equality and diversity, or multiculturalism, is the idea of promoting and accepting the differences between people. More specifically, equality is about ensuring individuals are treated fairly and equally, no matter their race, gender, age, disability or religion.

Class Project

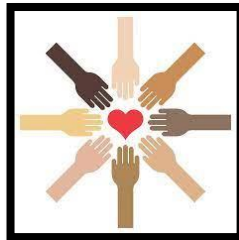

As a class or independently in your reflective journal design a page to show what equality means to you and how you can promote it as a person.

What is equality?

Why is equality important?

What problems do we face with equality?

What do we need to do as a society to make a difference?

What could we do in school to show equality for all?
