

# Coral does not grow on trees

31.3.22

JUNAID AIDARUS

The pandemic has increased pollution because of all the mask and people have just been thought there mask it the ocean like it a dumpster that is making the ocean warm so that is killing coral reefs you chose help the

Then is more than six thousand species in the world just in 2020 14 species and in 2022 10 species and by 2050 no coral will be alive unless we change . And some

people actually get there food from the Great Barrier the own of Australia tour island people of aboriginals

Coral reef provides a home for a lot of animals when we loss coral reef lot fo animals will loss there house and that not fare because would you like it if a animal that you like really no it do you want it to die
